

5 MAR 1979

25X1 NOTE FOR: [REDACTED]  
Physical Security Officer  
25X1 FROM: [REDACTED]  
Chief, CSG  
SUBJECT: Placement of Additional SAC Terminal at NE Entrance

1. The FPO at the NE Entrance asked me this morning, 2 March 1979, if there was any chance of getting two more units placed at that post. He gave me the attached note and supplemented his request with the observation that things really got tight for him when people came in and went out and one or more of the units was down which seems to be a frequent occurrence.

25X1 2. Can you give me a couple of groups to pass on to FPO [REDACTED]

To whom This Concern.

I would like to suggest that you add two more Lac's machines to the North East Entrance. For the purpose of Access & Egress. I think it will help a lot. Since we only have four machines at this entrance. Some times I only have three machines to work with. one is either out of base or the arm is broken. To add two more machines would give a total of six machines. If one breaks down I would still have five machines to work with.
